Projects

CultFit Clone

A fitness website where users can purchase fitness-related equipment and get information about health & nutrition. Users can also fix one-on-one training sessions with coaches.

Features:

- Sign-in/Sign-up
- Set location and Edit Profile
- Product catalog with Add to Cart and Checkout

Tech Stack: HTML | CSS | Bootstrap | JavaScript | Node JS | Express JS | EJS | MongoDB Atlas

Areas of responsibility:

- Built authentication and integrated it with the frontend.
- Laid out the database schema and build the REST API for the same.
- Developed the Home and Profile pages, & all animation & responsiveness.
- Developed the Profile page for users.

A collaborative project built by a team of 3 executed in 4 days.

Caddy Cool (An app for diabetes management)

Through this app, users can connect with different devices that will keep track of their pulse rates, sleep, glucose level, etc.

It will also keep track of the medicine they took or missed.

Also, they can connect to the caddy community groups, can chat with them.

Features:

- Sign-in/Sign-up
- Connect devices, monitor pills, pulse, sleep etc.

Tech Stack: React JS | CSS-Module | JavaScript | Node JS | Express JS | mongoose | MongoDB Atlas.

Areas of responsibility:

- Built authentication and integrated it with the frontend.
- Laid out the database schema and build the REST API for the same.
- Developed real-time chat functionality.
- Developed the list of users.

A collaborative project built by a team of 6 executed in 6 days.

Note: This Web-App is especially for iPhone X.

Food Recipe App

A web application to see food recipes on a daily basis and search for any recipe.

Features:

- Includes a Landing Page, 1 page to show a random recipe, 1 page with the latest recipe, and a fourth page to search for recipes.
- Users can contact the developer by tapping on the contact number or email id in the contact section.

Tech Stack: HTML | CSS | Bootstrap | JavaScript | Node JS | API

A solo project was built and executed in 3 days.
